Full-stack engineer with 3+ years of experience building scalable mobile applications, web apps and AI-powered systems. Experienced in LLM integration, schema-grounded SQL generation, RAG architectures, and real-time analytics platforms using Next.js, React Native, ASP.NET, and PostgreSQL.

EDUCATION

National University of Computer and Emerging Sciences - FAST

Bachelor of Science in Computer Science

Karachi, PK

Jan 2021 – Dec 2024

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, SQL, Python

Frameworks/ORMs: Next.js, React, React Native, ASP.NET Core, Node.js, NestJS, Fastify, Entity Framework, Dapper, Prisma, Zod, GraphQL, Zustand

AI & Data: LLM Integration, Retrieval-Augmented Generation (RAG), Prompt Engineering, Schema Introspection, GPT-4o, Vercel AI SDK, PostgreSQL

Tools: Azure, Docker, AWS S3, OneSignal, Socket.IO, Supabase, Git, TanStack Query, Redis, Redux Toolkit, Recharts

WORK EXPERIENCE

Full Stack Next.js Developer

Oct 2025 - Present

Bonded PK - Remote

Karachi, PK

- Designed and implemented an AI-powered analytics layer inside an Orthodontic Patient Management System enabling production-grade natural language querying over operational and financial datasets.
- Built a schema-grounded SQL generation pipeline using dynamic PostgreSQL schema introspection (tables, enums, relationships) to eliminate LLM hallucinations.
- Integrated GPT-4o via Vercel AI SDK with structured output enforcement and query validation to ensure safe production execution.
- Integrated GA4 to bridge marketing attribution with treatment start and revenue analytics, delivering real-time visualizations with Recharts and TanStack Query.

Full Stack Developer

July 2024 - Oct 2025

Kaizen Software Solutions - Onsite

Karachi, PK

- Designed and implemented secure, role-based ASP.NET Web APIs with JWT authentication and optimized database schemas for multi-tenant applications.
- Built and shipped React Native (Expo) apps with Redux Toolkit/RTK Query for performance optimization
- Deployed ASP.NET Web APIs and databases to Azure with CI/CD pipelines, ensuring scalable and reliable production releases.
- Engineered a scalable Next.js purveyor dashboard with TanStack Query for real-time data caching, improving responsiveness and reducing API load.

Junior Software Engineer

Feb 2024 - July 2024

NETTCORE - Onsite

Karachi, PK

- Implemented server-side rendering and optimized web application performance using Next.js
- Managed and revitalized an older ASP.NET project, implementing updates and improvements.
- Maintained a cross-platform mobile application, ensuring optimal performance through the use of React Native.

PROJECTS

QuickBuy - Multi-Purveyor Grocery Platform | *React Native (Expo), ASP.NET, Next.js, SQL*

- Built a cross-platform grocery app with multi-cart checkout across multiple vendors, secure ASP.NET APIs with JWT auth, and role-based access for users and purveyors.

Bento - AI-Powered Recipe & Assistant App | *React Native (Expo), ESP-32*

- Contributed to a food recipe app with AI assistant integration and implemented Wi-Fi provisioning over Bluetooth for ESP-32 hardware configuration.

Community Vote Tracker | *React Native, ASP.NET, SQL Server*

- Developed a community voting app with Redux Toolkit/RTK Query state management and ASP.NET backend with Dapper ORM, deployed on Azure.
